SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript
- **Frameworks & Libraries:** FastAPI, Flask, Django, Django REST Framework, React.js
- **Databases:** MySQL, PostgreSQL, DynamoDB, AWS RDS, SQLAlchemy, ORM Queries
- **Cloud Platforms:** Amazon Web Services (Lambda, API Gateway, S3, RDS, EC2, SQS), Google Cloud Platform
- **DevOps & Tools:** GitLab CI/CD, Docker, AWS CodeBuild, AWS CodePipeline, Linux/Unix/Windows, VSCode, Postman, pgAdmin
- **Software Design & Optimization:** Object-Oriented Design, Data Structures & Algorithms, Scalability, Load Balancing, Caching
- **Key Concepts:** RESTful APIs, Microservices Architecture, Asynchronous Programming, Data Pipelines

PROFESSIONAL EXPERIENCE

Python Full Stack Developer, FRS Labs Research Systems Private Limited

May 2023 - Present

Key Skills: Python, FastAPI, RESTful APIs, Microservices, MySQL, DynamoDB, Redis, JavaScript, TypeScript, React, GitLab

- Design and develop modular backend systems, APIs, and microservices using Python.
- Lead end-to-end development, including architecture, coding, testing, deployment, and maintenance of high-performance applications.
- Integrate RESTful APIs in the frontend using React.js, TypeScript, and Next.js, ensuring seamless communication between services.
- Optimize API response times from 30s+ to <6s by implementing Redis caching, async processing, stored procedures, and views.
- Implement CI/CD pipelines and containerization using GitLab and Docker, improving deployment speed and system reliability.
- Collaborate with cross-functional teams, ensuring high performance through secure coding and reducing vulnerabilities by 25%.

Software Developer Intern, Pibit.ai

Nov 2022 - Apr 2023

Key Skills: Python, FastAPI, Microservices, MySQL, DynamoDB, Docker, AWS (Lambda, S3, RDS, API Gateway), documentation

- Debugged and resolved issues in existing codebase, improving system stability, performance, and maintainability.
- Designed and maintained RESTful APIs, ensuring seamless data flow, uptime, and peak performance through extensible architecture.
- Deployed and managed cloud services on AWS (Lambda, S3, RDS, API Gateway, DynamoDB) for cost-effective scaling.
- Authored clear and concise technical and API documentation to support system understanding and usability.

Software Developer, Careers360

Aug 2022 - Oct 2022

Key Skills: Python, Django, Django REST Framework, RESTful APIs, Microservices, MySQL, Elasticsearch, Docker

- Executed efficient web applications and RESTful APIs using Django and DRF, enhancing backend efficiency and maintainability.
- Implemented and optimized MySQL queries using indexing, normalization techniques, and data integrity standards
- Integrated Elasticsearch to enable efficient data retrieval and full-text search, contributing to scalable and responsive search features.
- Studied and applied the core principles of microservices structure to design modular services, promoting scalability.
- Collaborated with cross-functional team, participating in CI/CD workflows and contributing to smooth deployments.

Technical Content Writer Intern, Geeks for Geeks

Feb 2021 - Jul 2022

- Authored 70+ technical articles and improved 20+ for Geeks for Geeks, showcasing dedication to high-quality content.
- Simplified complex technical concepts into clear documentation and tutorials.

PROJECTS

E-commerce website using Django

Tech Stack: Django, Django REST Framework, SQLite

- Engineered a full-stack e-commerce application enabling secure checkout, cart management, and dynamic product browsing.
- Developed end-to-end product and order management features with seamless form validation and secure user authentication.
- Configured SQLite database with Django ORM, optimizing query performance and ensuring efficient data storage and retrieval.

Instagram Clone APP

Tech Stack: FastAPI, React.js, SQLAlchemy, WebSockets, PostgreSQL, Docker, JWT Authentication, Async Tasks

- Built a FastAPI-based backend with authentication, posting, and commenting, integrating SQLAlchemy ORM for DB management.
- Engineered async tasks for improved performance, API deployment, and efficient request handling in a growth-ready environment.
- Created a React.js web client with real-time updates using web sockets, ensuring seamless user interactions.

ACHIEVEMENTS

- Participated in the **Google Cloud Arcade Facilitator Program** and reached the **Advanced Milestone**.
- Authored **70+ technical articles** and **improved 20+**, achieved the Scholar Writer badge on GFG.
- Contribute to the Write It Up Event 2023 by GFG and **receive top contributor goodies**.
- **Published 20+** articles in Geeks Premier League 2022 and **secured 9th place**.
- **Ranked 5th** in Blogthon 2021.
- **Ranked 7th** in ProGeeks Cup 2021.

EDUCATION

Jaypee University,

Aug 2018 – May 2022

Bachelor of Technology (B.Tech) - Computer Science and Engineering

BK SR SEC SCHOOL,

Apr 2015 – May 2018

Secondary & Higher Secondary Education - Physics, chemistry, and mathematics (PCM)
